

7th International Olympiad of Science

Presented by SILVER ZONE ISO 9001: 2000 Certified

Organized by Society of Science Education New Delhi, India

SILVER ZONE FOUNDATION

Question Paper Cum Answer Sheet

CLASS - 6 Duration : 40 Minutes Total Questions : 40 Maximum Marks :100

SCIENCE **2nd Level**

iOS Roll Number

Student's Name

TEST PAPER TYPE
AD

INSTRUCTIONS

1. **Write your 12 digit iOS roll number and your name on top of the question paper in the given space.**
2. **Filling up improper roll number may lead to unavailability of 'Result'.**
3. **This Question Paper cum Answer Sheet must be submitted to your teacher after the completion of the test.**
4. **This question paper consist of 40 questions. Each question carries equal marking of 2.5 marks each.**
5. **Tick ☑ your answer (A, B, C, D or E) on the given space in this Question Paper cum Answer Sheet with HB Pencil or Black/Blue Ball point Pen.**
6. **This question paper contains 4 pages.**
7. **Do not start attempting the test paper till you are asked to do so.**
8. **Minutes Consumed : The teacher must write the time consumed by the student to complete the paper.**

SIGN. OF THE STUDENT	SIGN. OF THE TEACHER	MINUTES CONSUMED

1. Which one of the following statements about food is incorrect?

(A) ☐ Food is a substance that provides us energy for various activities
(B) ☐ Plants and animals are the main sources of food that we eat
(C) ☐ Food protects us from various diseases and keeps us healthy and fit
(D) ☐ Food is not essential for plants
(E) ☐ None of these

2. Which one of the following statements is incorrect about air?

(A) ☐ Air is a colourless substance
(B) ☐ Air can be compressed
(C) ☐ Air dissolves in water
(D) ☐ Air occupies space
(E) ☐ None of these

3. Water cycle in nature involves which of the following process?

(A) ☐ Evaporation (B) ☐ Condensation
(C) ☐ Melting (D) ☐ All of these
(E) ☐ None of these

4. Read the food items given below.

(i) Rice (ii) Butter
(iii) Spinach (iv) Iodised salt

Which of the above food items are energy giving food?

(A) ☐ (i) and (iv) (B) ☐ (ii) and (iv)
(C) ☐ (i) and (ii) (D) ☐ (ii) and (iii)
(E) ☐ None of these

5. Look at the following figure and choose the correct option.

(A) ☐ The plant, shown in the above figure, stores food in its root
(B) ☐ The plant, shown in the above figure, stores food in its stem
(C) ☐ The plant, shown in the above figure, stores food in its leaf
(D) ☐ The plant, shown in the above figure, stores food in its flower
(E) ☐ None of these

6. The main symptom of iodine deficiency disease in a person is that:

(A) ☐ Abdomen of the person appears swollen
(B) ☐ Neck of the person appears swollen
(C) ☐ The ribs of the person look very prominent
(D) ☐ The skin of the person becomes rough
(E) ☐ None of these

7. Which one of the following pairs of materials is insoluble in water?

(A) ☐ Groundnut oil and coconut oil
(B) ☐ Milk and salt
(C) ☐ Sand and alum
(D) ☐ Chalk powder and alcohol
(E) ☐ None of these

8. X is a natural fibre. It is obtained from stem of a plant. X is a rough fibre so it is not used for making fabrics however used to make ropes and gunny bags. Identify X.

(A) ☐ Jute fibre (B) ☐ Cotton fibre
(C) ☐ Wool fibre (D) ☐ Flax fibre
(E) ☐ None of these

9. If Box A weighs 1 quintal and Box B weighs 10 metric tons, Box B is how many times heavier than Box A?

(A) ☐ 2 times (B) ☐ 10 times
(C) ☐ 100 times (D) ☐ 1000 times
(E) ☐ None of these

10. A solution having the temperature 20°C is saturated. It means:

(A) ☐ no more substance can be dissolved in the solution at that temperature
(B) ☐ only 100 g more substance can be dissolved in the solution at that temperature
(C) ☐ only 1000 g more substance can be dissolved in the solution at that temperature
(D) ☐ temperature of the solution need to decrease to dissolve more substance in it
(E) ☐ None of these

11. Which one of the following statements is incorrect?

(A) ☐ To make fabric, fibres are first converted to yarn
(B) ☐ Fibres are very thin, thread-like strands from which fabrics is made
(C) ☐ Jute grows best in warm, humid climates with plenty of rainfall
(D) ☐ The coconut fibres are used to make ropes and mats
(E) ☐ None of these

12. Choose the option containing four materials, in which two of the materials are heavier than water and the two are lighter than water.

(A) ☐ Aluminium, copper, gold, ice
(B) ☐ Coconut oil, mustard oil, groundnut oil, stone
(C) ☐ Coconut oil, wood, dry leaves, glass
(D) ☐ Glass, petrol, coconut oil, ice
(E) ☐ None of these

13. Which one of the following statements about chemical changes is incorrect?

(A) ☐ Atoms forming the molecules undergo changes
(B) ☐ The molecules of the substance change
(C) ☐ New substances are formed
(D) ☐ Most of the chemical changes are irreversible
(E) ☐ None of these

14. The property used, in the method of separation shown below, is:

(A) ☐ difference in size
(B) ☐ difference in weight
(C) ☐ difference in colour
(D) ☐ difference in volume
(E) ☐ None of these

15. Given below are the solubilities of some substances per 100 grams of water:

Substance	Solubility in water (at 20°C)
Copper sulphate	21 grams
Potassium nitrate	32 grams
Sodium chloride	36 grams
Sugar	204 grams

Choose the incorrect option.

(A) ☐ The solubility of different substance in water is different
(B) ☐ More than 204 grams of sugar can be dissolved in 100 grams of water at 20°C
(C) ☐ 100 grams of water at 20° C can dissolve maximum 21 grams copper sulphate
(D) ☐ 100 grams of water can dissolve only 32 grams of potassium nitrate but the same 100 grams of water can dissolve 204 grams of sugar at the same temperature of 20° C
(E) ☐ None of these

16. In which one of the following cases a drought occurs?
(A) ☐ When it rains heavily
(B) ☐ When it does not rain for a long period
(C) ☐ When water cycle in nature stopped working
(D) ☐ When excessive water is released in air by plants in the process of transpiration
(E) ☐ None of these

17. Which one of the following statements is incorrect?
(A) ☐ Cartilage is present in the pinnae of ears
(B) ☐ Cartilage is found at the end of nose
(C) ☐ Cartilage is found on the end of bones where they meet one another at a joint
(D) ☐ Cartilage is present between the vertebrae of backbone
(E) ☐ None of these

18. Which one of the following combinations of features would you observe in the plant given below?

(A) ☐ Parallel venation and tap root
(B) ☐ Parallel venation and fibrous root
(C) ☐ Reticulate venation and tap root
(D) ☐ Reticulate venation and fibrous root
(E) ☐ None of these

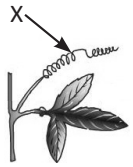

19. The lower jaw is connected to the skull by which one of the following joints?
(A) ☐ Fixed joint
(B) ☐ Pivot joint
(C) ☐ Hinge joint
(D) ☐ Ball and socket joint
(E) ☐ None of these

20. Which of the following are the characteristics of living beings?
(i) Respiration (ii) Reproduction
(iii) Excretion (iv) Growth
Choose the correct answer from the options given below.
(A) ☐ Only (i) and (ii)
(B) ☐ Only (ii) and (iii)
(C) ☐ (i), (iii) and (iv) only
(D) ☐ (i), (ii), (iii) and (iv)
(E) ☐ None of these

21. In which one of the following cases a magnet can lose its property of magnetism?
(A) ☐ If the magnet is heated strongly
(B) ☐ If the magnet is hit with a hammer
(C) ☐ If the magnet is being dropped from a height
(D) ☐ All of these
(E) ☐ None of these

22. Which one of the following statements about water is incorrect?
(A) ☐ Water is used in agriculture for growing crops
(B) ☐ Water is used in industries for producing papers, bread, biscuits etc.
(C) ☐ Water is used to keep things cool
(D) ☐ Water is used to generate electricity
(E) ☐ None of these

23. Name the part of the plant indicated by X.

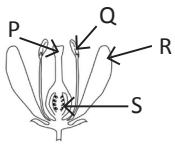

(A) ☐ Tendril (B) ☐ Lamina
(C) ☐ Mid rib (D) ☐ Petiole
(E) ☐ None of these

24. Motion of a child on a swing is an example of:
(A) ☐ rectilinear motion
(B) ☐ periodic motion
(C) ☐ rotational motion
(D) ☐ circular motion
(E) ☐ None of these

25. X is a transparent material. It means:
(A) ☐ X allows light to pass through it
(B) ☐ X does not allow light to pass through it
(C) ☐ X allows very small amount of light to pass through it
(D) ☐ X produces shadow when light passes through it
(E) ☐ None of these

26. Which one of the following options contains three insulators and one conductor of electricity?
(A) ☐ Rubber, mica, cotton, wood
(B) ☐ Plastic, paper, wax, air
(C) ☐ Silver, copper, aluminium, gold
(D) ☐ Rubber, plastic, aluminium, mica
(E) ☐ None of these

27. Which one of the following parts of the flower contains ovules?

(A) ☐ P (B) ☐ Q
(C) ☐ R (D) ☐ S
(E) ☐ None of these

28. Which one of the following matches is incorrect?
(A) ☐ Upper arm → Humerus
(B) ☐ Lower arm → Radius and Ulna
(C) ☐ Upper leg → Femur
(D) ☐ Lower leg → Tibia and Ulna
(E) ☐ None of these

29. Yak is well adapted to live in:
(A) ☐ high altitude mountain regions
(B) ☐ tropical forests
(C) ☐ low lying grass lands having hot climate
(D) ☐ desert
(E) ☐ None of these

30. Sonia observed the shadow of a tree at 8:00 a.m., 12:00 noon and 3:00 p.m. Which of the following statements is closest to her observation about the shape and size of the shadow?
(A) ☐ The shape of the shadow of the tree changes but the size remains the same
(B) ☐ The size of the shadow of the tree changes but the shape remains the same
(C) ☐ Both the size and shape of the shadow of the tree change
(D) ☐ Neither the shape nor the size of the shadow changes
(E) ☐ None of these

31. Which one of the following is not a method of disposal of garbage?
(A) ☐ Composting
(B) ☐ Vermi-composting
(C) ☐ Recycling
(D) ☐ Winnowing
(E) ☐ None of these

32. Which one of the following is the most attractive part of a flower?
(A) ☐ Sepals (B) ☐ Petals
(C) ☐ Stamen (D) ☐ Pistil
(E) ☐ None of these

33. How many phalanges are there in the middle finger of our left hand?
(A) ☐ 1 (B) ☐ 2
(C) ☐ 3 (D) ☐ 4
(E) ☐ None of these

34. Which one of the following statements is correct about switch?
(A) ☐ It is a part of a bulb which glows when electricity passes through it
(B) ☐ It is a simple device which is used to open or close a circuit
(C) ☐ It is a device which does not allow electricity to pass through it
(D) ☐ It is a safety device which protects electrical instruments in the case of short-circuits
(E) ☐ None of these

35. Which one of the following options contains two magnetic materials and one non-magnetic material?
(A) ☐ Iron, nickel, diamond
(B) ☐ Graphite, glass, leather
(C) ☐ Steel, cobalt, iron
(D) ☐ Lead, brass, aluminium
(E) ☐ None of these

36. Which one of the following statements is incorrect?
(A) ☐ Oxygen gas is essential for breathing
(B) ☐ Oxygen gas is essential for the process of burning
(C) ☐ Oxygen gas extinguishes a burning fire
(D) ☐ Oxygen is a colourless, tasteless and odourless gas
(E) ☐ None of these

37. If you dump kitchen waste in a pit, it may, after sometime:
(A) ☐ convert into compost
(B) ☐ convert into vermi-compost
(C) ☐ remains as such
(D) ☐ remains forever in its dried form
(E) ☐ None of these

38. The small bones which make up the backbone are called:
(A) ☐ vertebrae (B) ☐ ribs
(C) ☐ collar bones (D) ☐ All of these
(E) ☐ None of these

39. Respiration is a process in which:
(A) ☐ energy is obtained from food
(B) ☐ food is prepared from simple organic substances
(C) ☐ fat is converted into fatty acid
(D) ☐ the waste substances are removed from the body
(E) ☐ None of these

40. Which one of the following is the most common adaptation found in almost all mammals living in cold places like high altitude mountains?
(A) ☐ Gills
(B) ☐ Short legs
(C) ☐ Thick skin or fur
(D) ☐ Slippery scales
(E) ☐ None of these
