SAMPLE PAPER
SCIENCE

SET-A

Class: VIII **Maximum Marks: 80**
Date: 00.00.2025 **Time Allowed: 3 hours**

GENERAL INSTRUCTIONS

- This Question Paper has 26 questions and 3 printed pages.
- All questions are compulsory to attempt.
- Mention the correct serial number of the question and attempt the paper neatly.

SECTION A

1. Choose the correct option for the following questions. 9×1=9

A. Which of the following statement is not true for organic manure?
a. It enhances water holding capacity of soil.
b. It has a balance of all plant nutrients.
c. It provides humus to soil.
d. It improves texture of soil.

B. Various materials which are obtained from nature are called natural resources. Which of the following is not a natural resource?
a. minerals b. soil c. water d. plastic

C. Wild buffalo is an endangered species because _____
a. its population is diminishing b. it has become extinct
c. it is found exclusively in a particular area d. its poaching is strictly prohibited

D. Exhaustible natural resources are_____.
a. unlimited in quantity b. not dependent on nature
c. limited in quantity d. not exhausted by human activities

E. What is the band of seven colours?
a. Refraction b. Spectrum c. Dispersion d. Reflection

Question F to I are Assertion (A) and Reason (R) based questions. Two statements are given- one labelled as Assertion (A) and the other labelled as Reason (R). Choose the correct answer.
a. Both A and R is true, and R is correct explanation of A.
b. Both A and R are true but R is not correct explanation of A.
c. A is true but R is false.
d. A is false but R is true.

F. **Assertion (A):** Vaccines prevent diseases.
Reason(R): Vaccines should be given only to children
G. **Assertion (A):** Apple falls on the ground due, to gravitational force.
Reason(R): Gravitational force is a contact force.
H. **Assertion (A):** Coal, petroleum, and natural gas are fossil fuels.
Reason(R): They are formed from dead remains of plants and animals.
I. **Assertion (A):** Light reflects best on smooth, polished surfaces.
Reason(R): Rough surfaces absorb all light falling on them.

2. Fill in the blanks. 6×1=6

A. Microorganisms are visible only under a _____.
B. To draw water from a well we have to _____ at the rope.
C. Forests and coal are _____ resources.
D. Burning of fossil fuels causes _____.
E. If you touch your _____ ear with right hand in front of a plane mirror it will be seen in the mirror that your right ear is touched with _____.
F. The outermost layer of earth is called_____.

3. Why we use tractor driven cultivator for ploughing now a days? 1

4. Name the products obtained when coal is processed in industry. 1

5. Why are forests called the lungs of the earth? 1

6. Would the laws of reflection change if the mirror was curved? 1

7. Name one commercial use of yeast. 1

SECTION B

8. What effect does the continuous cultivation of crops have on the soil? How this issue can be addressed? 2

9. Why is a smelling agent added to LPG? Name the substance used for this. 2

10. What are the consequences of disrupting food chains due to species extinction? 2

11. In the following situations identify the agent exerting the force and the object on which it acts. State the effect of the force in each case. 2
A. Squeezing a piece of lemon between the fingers to extract its juice.
B. Taking out paste from a toothpaste tube.

12. What are fault zones? Are they on or below the earth's surface? 2

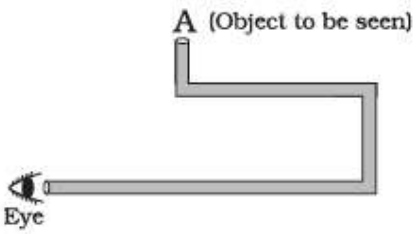

13. Write one point of difference between real image and virtual image. 2

14. Why are dry fruits and packaged foods often sold in sealed air-tight containers? 2

15. The angle between incident ray and reflected ray is 60°. What is the value of angle of incidence? 2

SECTION C

16. 1+1+1

Boojho planned an activity to observe an object A through pipes as shown in figure, so that he could see objects which he could not directly see.
a. How many mirrors should he use to see the objects?
b. What must be the angle with respect to the incident light at which he should place the mirrors?
c. Indicate the direction of rays in the figure.

17. Sonu conducted an experiment by growing seeds in three pots: 3
Pot A: soil only
Pot B: soil + manure
Pot C: soil + fertilizer
a. Will plant growth be uniform in all pots?
b. Which pot will show best growth and why?
c. In which pot will plants grow chemical-free and why?

18. 'A' is a fuel used in vehicles but causes pollution. 'B' is derived from fossil fuels but is considered clean. 2+1
a. Identify A and B.
b. Mention two uses of B apart from vehicles.

19. A. How can you contribute to the maintenance of green wealth of your locality? 2+1
B. Why should paper be saved?

20. Observe the vessels A, B, C and D shown in figure carefully. Volume of water taken in 1+2

each vessel is as shown. Arrange them in the order of decreasing pressure at the base of

each vessel. Explain.

21. A. Name the scale on which the destructive energy of an earthquake is measured. 1+2
B. An earthquake measures 3 on this scale. Would it be recorded by a seismograph? Is it likely to cause much damage?

22. Seema finds her homemade pickle spoiled in summer. 1+2
A. Why does food spoil faster in summer?
B. What preservation techniques should she use?

SECTION D

23. A farmer grows only paddy in the same field for five consecutive seasons. 2+2+1
a. Why does the yield decline over time?
b. Suggest a sustainable solution to improve productivity.
c. Why should manure be added to the soil before ploughing?

24. A. Two persons are applying forces on two opposite sides of a moving cart. The cart still moves with the same speed in the same direction. What do you infer about the magnitudes and direction of the forces applied? 2+1+2
B. A chapatti maker is a machine which converts balls of dough into chapati. What effect of force comes into play in this process?
C. An archer shoots an arrow in the air horizontally. However, after moving some distance, the arrow falls to the ground. Name the initial force that sets the arrow in motion. Explain why the arrow ultimately falls down.

25. A. During the construction of a building the lightning conductor was left hanging in the air by mistake. Would the lightning conductor be still effective? Explain. 2+3
B. If air and cloud were good conductors of electricity, do you think lightning could occur? Explain.

SECTION E

26. Answer the following questions on the basis of your understanding of the following paragraph and the related studied concepts.

A. After a virus outbreak, herbivores drastically reduce in number. 1+2+1
a. Predict the effect on carnivore population.
b. What happens to the plant population and why?
c. Why should we conserve biodiversity?

B. Reema has chickenpox. Her friend Seema avoids visiting but calls her regularly.
A. What causes chickenpox?
B. How is it transmitted?
C. Name another disease caused by the same pathogen.
D. Why did Seema avoid direct contact? 4×1=4
