Indraprastha WORLD SCHOOL
Paschim Vihar, New Delhi-110063
Session: 2023-24
Sample Paper
Subject: Science

Class: VI **Maximum Marks: 80**
Time Allowed: 3 Hours

General Instructions

- This question paper consists of 19 questions and 3 printed pages.
- All the questions are compulsory.
- Attempt the paper neatly and legibly.
- Mention the same question number in your answer sheet.

Section A

1. Choose the correct option for the following questions. **15**

a. The food components needed by our body are called _____.
i. ingredients ii. nutrients iii. fragments iv. ornaments

b. Carbohydrates can be tested by using _____.
i. iodine solution ii. caustic soda iii. copper sulphate iv. fehling solution

c. Silver, aluminium and gold have_____ appearance .
i. lustrous ii. black iii. non lustrous iv. soft

d. Material that cannot be compressed easily are called _____.
i. soft ii. rough iii. hard iv. Scaly

e. Mixture of oil and water is _____.
i. soluble ii. insoluble iii. translucent iv. opaque

f. Which of the following is an example of magnetic substance?
i. Cobalt ii. Wood iii. Paper iv. Plastic

g. A device which produces electricity from reacting chemicals stored inside it is called_____.
i. bulb ii. battery iii. wire iv. switch

h. Kelvin is the unit of _____.
i. length ii. time iii. mass iv. temperature

i. Which of the tree has no branches?
i. Mango ii. Neem iii. Coconut iv. Banyan

j. Which of the following is a correct relationship?
i. 1 m = 100 cm ii. 1 cm = 100 mm iii. 1 km = 100 m iv. 1 cm = 10 m

k. _____ is a type of root.
i. Ginger ii. Potato iii. Coconut iv. Turmeric

l. _____ is a type of stem.
i. Ginger ii. Sweet-potato iii. Carrot iv. Turnip

m. Which is not an example of periodic motion?
i. Rotation of motion ii. Revolving blades of fan iii. Buzzing bee iv. A swing in motion

n. The process used for separating grains from stalk is called _____.
i. winnowing ii. sieving iii. harvesting iv. threshing

o. The method used to obtain butter from curd is called _____.
i. churning ii. revolution iii. rotation iv. distillation

2. In the following, question two statements are given- one labelled Assertion (A) and the other labelled Reason (R). Select the correct answer to these question from the choices i, ii, iii and iv as given below. **4**

a. **Assertion (A)**: Dried beans and eggs contain appreciable amount of phosphorous.
Reason (R): Milk and dairy products are excellent sources of phosphorous.
i. Both A and R are true and R is correct explanation of A.
ii. Both A and R are true but R is not correct explanation of A.
iii. A is true but R is false.
iv. A is false but R is true.

b. **Assertion (A):** Water is called as universal solvent.
Reason (R): Water dissolves different amount of soluble substances.
i. Both A and R are true and R is correct explanation of A.
ii. Both A and R are true but R is not correct explanation of A.
iii. A is true but R is false.
iv. A is false but R is true.

c. **Assertion (A):** Plants release a lot of water into air through transpiration.
Reason (R): The water is released through leaves in the form of water vapour.
i. A is correct and R is correct explanation for A.
ii. A is correct but R is not the correct explanation for A.
iii. A is correct R is wrong.
iv. A is wrong R is correct.

d**. Assertion(A)**: Filament is a part of electric bulb.
Reason(R): Filament consists of thick metallic wire.
i. A is correct and R is correct explanation for A.
ii. A is correct but R is not the correct explanation for A.
iii. A is correct R is wrong.
iv. A is wrong R is correct.

3. Answer the following questions 3(a) – 3(d) on the basis of your understanding of the following paragraph and the related studied concepts. **8**

a. If there is some material that is burning in a closed room, we feel suffocated. This is due to excess of some gas that may be accumulating in the room, as the burning continues. Plants and animals consume oxygen for respiration and produce carbon dioxide. Plant and animal matter on burning, also consumes oxygen and produces carbon dioxide and a few other gases.

i. Name the gas which supports burning. The gas which supports burning is oxygen
ii. Why should we not burn coal in a closed room? We should not burn coal in a closed room because we will feel suffocated
iii. Why it is always advised to have a lot of windows in a room?
iv. Name the tiny pores on the surface of a leaf. Stomata

b. When we carefully look a leaf, we observe some lines. These lines are called veins. In some cases, we see a thick vein in the middle of the leaf. This vein is called Midrib. The design made by leaves is called leaf venation. If this design is net-like on both the sides of midrib, the venation is reticulate venation. If the veins are parallel, then the venation is parallel venation. Veins of the leaf can be seen on lamina.

i. What is midrib?
ii. What is leaf venation? Identify its types.
iii. What is lamina?
iv. With the help of a diagram, differentiate between the types of leaf venation

4. Fill in the blanks. **8**

a. Five kilometers is _____ mm.
b. Beriberi is caused due to deficiency of_____.
c. Materials that do not allow current to pass through them are called_____.

d. The food component present in sugar is_____.
e. The switch in the circuit is closed then the bulb will_____.
f. _____ is the standard unit of length and distance.
g. A liquid changing into vapour is called _____.
h. The mixture that do not mix with each other is called_____ liquids.

Section B

5. Which motion shows no change in direction of the moving body? **2**
6. What are petals and sepals in a flower? **2**
7. How do we measure the length of a curved line? **2**
8. Why the weak plants of gourd and watermelon bearing tendrils are generally grown as creepers and not as climbers? **2**
9. Name the two systems of flowering of plants. **2**
10. What are protective food? **2**

Section C

11. Name any 3 vitamins, their sources and deficiency diseases caused by them? **3**

12. Give reasons for the following. **3**
a. By eating rice alone, we cannot fulfill the nutritional requirement in our body.
b. Water and roughages helps in regulating digestion.

13. a. Draw and label the diagram of torch. **3**
b. Describe the working of torch.
14. a. Write two differences between conductors and insulators.
b. Why one should be always careful while touching the electrical appliances? **3**
15. Distinguish between soluble substances and insoluble substances. **3**
16. While measuring the length of a metallic rod the reading of the scale if one end is 3 cm and at the other end is 57.5 cm. What is the length of the rod? **3**

Section D

17. a. Why is it advised to avoid excess intake of fat in our diet? **5**
b. How will you measure the length of a curve line?
c. You are given a bar magnet. How will you find the west direction?

18. Define the following with example. **5**
a. Oscillatory motion
b. Periodic motion
c. Rotational motion

19. a. Which parts of the flower change to fruit and seed after fertilization? **5**
b. What is the transfer of pollen grains from anther of a stamen to the stigma of the pistil called?
c. Leaves of Mimosa plant droop if we touch them. Give reason.
d. Potato is called an underground stem. Give reason.
e. Define parallel venation.
